Or Connitment to Accessibility

Gestingacesible produts is a priority for MGraw HI Filtration. We have put implace processes to nake accessibility and neeting the WCAG2OAA guidelines part of our day to day development efforts and product roadmaps. We near use and track our progress to ensure we continually make improvements to achiese the evolving inclustry standards and to meet our learners' accessibility meets. VPATS are available upon request for both the earlier version of Cornect and the updated version. Our audits and VPATS are completed by a third party.

TestingProcess

We are committed to testing with users with different ranges of abilities and disabilities to ensure the usability and access bility of our products

Ascries of tests are conducted to ensure our compliance with the WCAG2OAAg idelines. Baseline assessments are completed, using attriid party vendor, to uncover gaps and informate mediation to admit As new features are developed, an accessibility specific success criterion is defined and all new work is tested to ensure it complies with the criteria prior to release. As these products continue to gow and the accessible feature set expands, semi-regular assessments will be completed by an external vendor to ensure continued compliance with the WCAGg idelines.

Alterrative Text Files We provide electronic files for use by sturbuts with disabilities. In order to send a file, we require a written request from the disability services center of your school. Requests can be submitted via Access Text Network at www.accesstext.org or submitted directly to MGraw Fill Fibration To submit to MGraw Fill, please emil us at <a href="milestration-organization-or

Many of our titles have alt descriptions of images available in a separate document provided to the DSS office. To request this file, please contact us at a cossibility@mheduration.com

MGawHIRtrationis actively working on developing none accessible assessment experiences. Insummer 2017, we updated a number of questions types with design and code improvements to improve access for student who require legboard access and so demonstrate to the transfer of a continue to make improvements with each platform release.

Content Feature	Definitions	Status & Alternatives
eBokisopeablewithouta nouse(keyboardnavigeble) and can be accessed using alternative output devices		WriteM-Elasmadegeat stricks in improving the accessibility of the original SmartBook, SmartBook 20 was built from the ground up with accessibility in mind, and induces appropriate color contrast, keyboard manigation, and so concealer use bility, to support students with accessibility reeds. A full accessibility audit will be completed so or 1
		Offered alongside SmartBock as a reading option for many of currecent titles, currewellook was built with accessibility in mind. Vision in paired users were required for testing sessions for both lapt open double apprecians. A recent technical audit shows that the majority of the reading experience is accessible, but there are still limitations with highlighting and with some multimedia content interactions. Continued development is underway to increase accessibility.
eBockinages have alternative descriptions/alternative text		Alt descriptions are embedded within the files. Students using assistive technology may find it difficult to maigate to the mat this time, due to the constraints of the technologies available. A file containing the alt descriptions can be supplied upon request. To request, please contact us at the information listed above.
